Education

York University **Expected May 2028**
Honours BSc, Computer Science *Toronto, ON, Canada*

- **Relevant Coursework:** Object-Oriented Programming, Data Structures & Algorithms, Software Design, Databases, Computer Organization

Technical Skills

Languages: Python, Java, C, JavaScript, SQL, HTML/CSS
Frameworks & Libraries: Django, Django REST Framework, FastAPI, React Native, AJAX
Developer Tools: Git/GitHub, Docker, Postman, DBeaver, Azure, MySQL, PostgreSQL, Agile/SDLC, Claude
Certifications: Python (Codecademy), Django (Udemy), Docker (KodeKloud), Intro to AI (LinkedIn)
Awards: UNHack 2024 — 1st Place, UmmahHacks 2026 — 2nd Place, Lassonde Entrance Scholarship
Leadership & Activities: Events Exec (YorkU MSA 2024-2026), Sales Associate (CellularPoint Summer 2025), Cricket

Experience

SWE & Tech Consultant Intern **Sept 2026 – Current**
Ministry of the Attorney General *Toronto, ON, Canada*

Junior Technical Analyst **Sep 2025 – May 2026**
Ministry of Transportation, Government of Ontario *Toronto, ON, Canada*

- Applied **DevOps** practice to design and containerize a full-stack Django app with **Docker**, isolating web and **MySQL** services for consistent development and deployment environments
- **Streamlined and automated** request tracking, overtime logging, and project-monitoring workflows for a **40+** member DMO team, replacing manual processes
- Designed and optimized MySQL relational schemas with persistent Docker volumes, ensuring data integrity and recovery across container restarts
- Led weekly sprint reviews and demos with project leads, turning stakeholder feedback into prioritized, iterative releases

Backend Software Engineer Intern **May 2024 – Aug 2024**
AletheaAI *Singapore*

- Built and maintained REST API endpoints in **Django**, implementing CRUD operations, database queries, and template rendering for core product features
- Audited and removed obsolete environment variables and deprecated APIs, reducing technical debt and simplifying backend configuration
- Performed **black-box testing** on the company's decentralized app (dApp), identifying and resolving critical bugs to improve reliability

Developer Intern **Jun 2022 – Jul 2022**
Arbisoft *Remote*

- Collaborated with a **20+** developer team to build and ship website features for an international fashion brand
- Built a trending products pop-up driven by user traffic and behavior analysis, improving product discovery and engagement
- Resolved front-end defects in product zoom and related UI components, improving overall site usability

Co-Founder & CEO **May 2020 – Feb 2023**
Rozgari (Non-Profit) *Remote*

- Co-founded a not-for-profit tackling daily-wage unemployment during the COVID-19 pandemic, **raising PKR 1,000,000** to launch the platform
- Built an online and SMS booking platform (**HTML/CSS/JS**) linking users to vetted home-service providers, scaling to **5** bookings per day within **12** months
- Onboarded **25+** service providers and led marketing partnerships over an **18**-month period

Projects

Agent-Twin | *Python, Django REST Framework, Google Gemini, ElevenLabs, JavaScript* **2025**

- Built a full-stack "AI digital twin" web app that learns a user's writing style and generates resumes, cover letters, and posts in their voice, using Django and **Google Gemini**
- Engineered a memory system that extracts, stores, and retrieves user experiences from text, image, and audio inputs for persistent, personalized context (**RAG-style retrieval**)
- Integrated **ElevenLabs** voice cloning for shareable, real-time voice conversations with the AI twin via custom REST endpoints
